## WORK EXPERIENCE

### SOFTWARE DEVELOPER

#### SearchingYard Group

04/2023 - Present

Bhubaneswar

##### Achievements/Tasks

- Developed and maintained frontend components for multiple web applications using **React.js** and **Redux**, resulting in improved performance and user engagement.
- Spearheaded the design and development of highly intuitive and responsive user interfaces using **React.js**, enhancing overall user experience and engagement.
- Designed and implemented **RESTful APIs** to facilitate communication between frontend and backend components, enabling seamless interaction and data exchange.
- Experienced in **optimizing database** queries and data access patterns to enhance performance and efficiency, utilizing **MongoDB** and **MySQL**.
- Proficient in deploying web applications on **Amazon Web Services (AWS)**, utilizing **EC2 instances** for scalable and reliable hosting solutions.

### Junior Software developer trainee

#### 10x Academy

07/2022 - 02/2023

##### Achievements/Tasks

- I have worked as a web Developer and increased the scalability of projects by 15 percent. Optimizing the code implementation using **Lazy Loading**, **Code Splitting**, and **Image Optimization**.
- As a frontend developer, I specialize in creating user-friendly websites with a keen focus on seamless navigation and compelling user experience.
- Contributed to the projects, focusing on **bug fixes** and optimizations to enhance the application's performance and stability. Debugged and resolved issues reported by users, improving the overall user experience.

## EDUCATION

### B.tech in Computer Science

#### Chandigarh University

03/2017 - 03/2021

## LANGUAGES

Hindi  
Full Professional Proficiency

English  
Full Professional Proficiency

## SKILLS

## PERSONAL PROJECTS

### AirTicketing Backend

- **TechStack:-** Javascript, express.js, node.js, MySQL, jwt, sequelize, Axios, **aws**, rabbitMQ. **GitHub:[Link]**
- I build an Airline Ticket Booking System using a Microservices Architecture approach to ensure modularity.
- Implemented **microservices** like Authentication service, reminder service, search and flight service, and booking service.
- Implemented **messaging queue** for email notification alerts using user-provided emails. Utilized **token-based authentication** for secure user account creation and login. Ensured robust authorization mechanisms for enhanced security.

### Affiliate Marketing Management website (Full-stack).

- **Front-end tech stack:-** Next.js, TypeScript, Tailwind-css, material Ui, apex chart, Framer motion, Zustand, Formik.
- **Back-end tech stack:-** MongoDB, Express.js, TypeScript, Prisma, Firebase, Nodemailer.
- **Demo[Link]**
- This website allows clients to list their products and monitor their sales.
- Clients can promote their products and offer referral commissions to promoters.
- To access the dashboard and utilize these features, clients need to purchase a monthly or yearly subscription plan.
